JT SERIES PUMPS

The JT Series pumps are among the quietest line of pumps with an unsurpassed ability to pump up to 400 GPM and the ability to operate safely in dry runs.

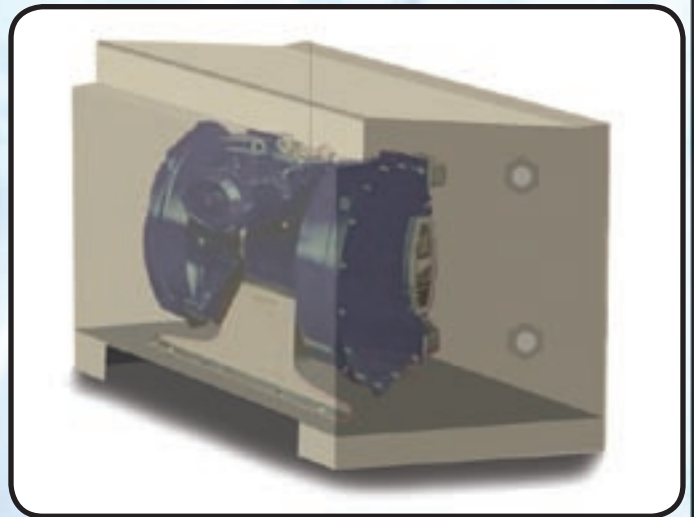

WHY CHOOSE A JT SERIES PUMP?

- Easy to install and simple to operate, JT Series pumps are designed for continuous use.
- Pump completely inclosed in a water resistant cabinet, made of noncorrosive metals.
- Abrasive slurries and shear-sensitive products can all be pumped in confidence.
- Excellent ability to handle aggressive high viscosity and high density products.
- Safe dry-running; the JT Series Pump does not need fluids in the hose to cool or lubricate the internal mechanisms, and can pump air intermittently or continuously without damage.
- Contamination-Free, the fluid is contained entirely within the hose, separated from the pump's rotating components. No other type of positive displacement pump offers this unique separation of pump and fluid.
- With no seals, valves, diaphragms, gland, rotors, stators, or pistons to leak, clog, corrode or replace, the JT Series Pumps are sanitary, easy to clean, and virtually maintenance free. Greatly reduces the cost of inventory investment and management.
- Back-flow and siphoning are eliminated, and no valves are needed.
- Self-priming and high suction lift capability allows maximum flexibility of installation.
- Output is directly proportional to pump speed and independent of inlet or discharge pressure conditions and fluid viscosity, giving superb metering capabilities.
- The specially compounded food grade lubricant also functions as a coolant and makes the JT Series Pumps especially quiet running.
- Variety of hoses available in abrasion and corrosion resistant materials, including Natural Rubber (NR), EPDM and internationally approved food-grade BUNA N (NBR).

Choose the perfect JT SERIES PUMP for any size application. Whether your pumping out a small boat, yacht, cruise ship, large marina, or operating a municipal water treatment plant or simply need to move large volumes of fluids, Far Products has the right size JT Series Pump for you.

A JT Series Pump can be customized to fit your particular application or need. Far Products is known throughout the pump industry for their superior manufacturing and customized solutions.

The next time you need a heavy duty pump, choose Far Products JT Series Pumps.

Model		
JT 250	10 GPM @ 1 1/2 HP	12 GPM @ 2 HP
JT 350	15 GPM @ 1 1/2 HP	25 GPM @ 3 HP
JT 400	22 GPM @ 2 HP	40 GPM @ 4 HP
JT 500	45 GPM @ 5 HP	70 GPM @ 7 1/2 HP
JT 650	100 GPM @ 10 HP	140 GPM @ 15 HP
JT 800	140 GPM @ 15 HP	170 GPM @ 20 HP
JT 1000	160 GPM @ 15 HP	250 GPM @ 25 HP
JT 3500	300 GPM @ 30 HP	400 GPM @ 40 HP
