FAR Products, Inc.

Maker of the "JONNY TRAP"™, is the forerunner in quality and innovative Pumpout Systems and Waste Removal Equipment.

Over one thousand of our pumps are in service around the world. Far Products has been committed for over 45 years to our customers and we continue to design new products to lead the way in pumpouts, allowing marinas around the world to have the best product available. All within one compact unit, the "Jonny Trap"™.

MANUFACTURING

30,000 SQ. FT. OF MODERN FACILITIES!

Are huge factory/warehouse allows us to be the leader in the manufacturing of high quality pumpout systems. Our experienced team of craftsmen have the knowledge and expertise to meet specific needs.

ENGINEERING

Our engineers are the among the highest skilled professional and are extremely efficient and very responsive to your specific needs. Using our patented processes, FAR Products equipment is custom designed for the application. In addition, FAR Products can design specialized pumpout systems to meet any demand!

JONNY TRAP 6000, 7000, and 8000 models have no pulsation unlike other types of pumps, which have a tendency to be noisy and vibrate violently. In addition, the Jonny Trap™ is engineered to give maximum flow for horsepower of any pumpout. These units are virtually maintenance free. The motor and pump are direct coupled so there is no misalignment between internal parts. Best yet, due to the compact design, Jonny Trap™ will save you valuable space where-ever you install it.

Fluids in the Jonny Trap™ 6000, 7000, and 8000 models will not pulsate! All internal parts are crafted from non-corrosive stainless steel materials. All Jonny Trap™ pumps are built as a positive displacement and self-priming unit which produces no vapors, odors, or hazardous gases. Additionally each unit is self cleaning.

All Jonny Trap™ units are contain a vacuum system which can rid fluids and sewage to a direct disposal unit at a distance of 2000 feet. The pump is enclosed in a NEMA 4

enclosure which is not subject to environmental hazards or contaminates unlike other manufacturers' units. With no level indicators to malfunction, you do not need to worry about overflows or running non-stop until you turn the pump off. Best of all, you have no micro controllers, no transistors, or electronics to adjust.

No need to use standard design or for specific needs, shapes, or sizes to pumpout. Far Products provides custom units to meet the needs of any customer demand. You also can choose from Jonny Trap's standard models, in stock, which range from 7 Gallons per minute up to 232 Gallons per minute. The pumpout units install with ease and have no electronic controller or level indicators to worry about malfunctioning.

QUALITY ASSURANCE

FAR PRODUCTS, INC. is committed to producing only the highest quality systems at competitive prices. We perform precision diagnostic testing and quality control procedures on every unit prior to shipping to the customer. In addition, the QC testing reduces the installation time on every pumpout system. It is our commitment to the highest quality systems which makes Far Products the leader in customer satisfaction. Our units meet or exceed customer satisfaction!

Marinas have been purchasing Jonny Trap™ pumpout units for nearly half a century. Those who buy a Jonny Trap™ pumpouts are committed to keeping the environment and our water ecosystems clean. They know only a Jonny Trap™ can attract new customers to their marina. Far Products has been producing Jonny Trap™ pumpouts with many different pumps and will size the pump for custom needs. Jonny Trap™ pumpouts have unique characteristics that make them out-perform all other pumpout systems.

Jonny Trap™

THE PERFECT PUMP FOR...

- Private Marinas
- Boat Yards
- Gas Docks
- Yacht Clubs
- Municipal Marinas
- Parks and Recreation Facilities
- Commercial Facilities
- Industrial Facilities
- Portable Applications
- Boat Storage Centers
- Distances up to 2000 ft.
- Waste Water
- Sewage
- Municipal Treatment Plants
- Boats of all sizes

CUSTOM DESIGNED SYSTEMS

- Control your entire waste system from one convenient location.
- Take command of all customer service systems.
- Designed to your specific needs and marina layout.

OVER

45

YEARS OF
EXCELLENCE

Since 1958

**JONNY TRAP
MARINE PRODUCTS**

Jonny Trap Features (6000, 7000, & 8000 Series)

- No pulsation
- No valves to foul
- No gears
- No diaphragms
- No bearings in pump
- No electronic controller
- No level indicators
- Few parts
- Compact Design
- Highest efficiency
- Highest vacuum lift
- Highest pressure discharge
- Solid mounting
- Longest hose connection to boat
- Easy installation

Pump Totally Inclosed!
Corrosion Free Cabinet!
